Galaxy 3S (11.1V) Lipoly Pack

Price: 19.82CAD
14.00 **USD** 12.44 **EUR**

★★★★★
5 stars, based on 3 review(s)

• Exactly what your bots need! Lithium Polymer (lipoly) batteries are very
hold a higher percentage of their capacity at the rated discharge rate thar
products on the market which means longer run times.

• These high-discharge packs have no problem with the large current req
robots.

• High quality silicone-insulated wire for high current applications.

• Seven capacities of: 120, 180, 250, 300, 450, 850 and 1000mAh

Shipping Restriction - see shipping note for lipoly batteries.

Description | Reviews | Related

- Exactly what your bots need! Lithium Polymer (lipoly) batteries are very lightweight cells, but have a greater power density than NiCad
- Lipoly chemistry can supply its rated current for longer than NiMH or NiCad equivalents, which means your weapon and drive will go fu
rather than sagging voltage as it discharges.
- These cells have no problem with the large current requirements of combat robots.
- LiPoly cells do not develop bad memory during charging.

Specifications:
- Configuration: 3S (11.1V)
- High quality silicone-insulated wire for high current applications.
- Mating connector:
-- JST for 120, 180, 250, 300, and 450mAh
-- XT30 for 300 and 450mAh (newly added)
-- XT60 for 850 and 1000mAh
- Balance connector on every size for ensuring packs are at their best before an event!
- Max charge rate: 2C (2x the pack mAh rating) - the C6D Mini Charger is a great charging solution.
* Do not discharge Lipo batteries below 3.3V per cell (9.9V for a 3S pack). We sell Lipo Low Voltage Alarms to give an audible warning v
reaches this limit.

Add 5mm to the length where the wires exit. Below are *usable* (maximum) dimensions, not the slimmest or average size!

Capacity:	Maximum current discharge: (Burst is for 15 seconds)	Dimensions: (W x L x H)	Weight:
120mAh	25C Cont (3A), 40C Burst (4.8A)	19 x 25 x 23mm	15 grams (0.53o
180mAh	45C Cont (8.1A), 90C Burst (16.2A)	20 x 35 x 18mm	20 grams (0.71o
250mAh	35C Cont (8.8A), 70C Burst (17.5A)	21 x 40 x 17mm	23 grams (0.81o
300mAh	45C Cont (13.5A), 90C Burst (27A)	18 x 45 x 20mm	26 grams (0.95o
450mAh	45C Cont (20.3A), 90C Burst (40.5A)	32 x 53 x 15mm	40 grams (1.41o
850mAh	45C Cont (38.3A), 90C Burst (76.5A)	31 x 56 x 22mm	69 grams (2.43o
1000mAh	45C Cont (45.0A), 90C Burst (90.0A)	35 x 68 x 18mm	79 grams (2.79o

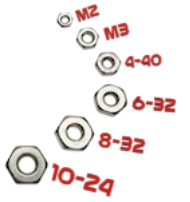

Note - Lipoly batteries are shipped at 30% capacity and must be fully charged before first use. 30% is not a lot, and you run the risk of o pack and damaging it if you don't charge before first use.

Shipping Restriction - see shipping note for lipoly batteries.
